

Module 2:

Deeper Into Analysis

Topic 2: Email Addresses

Investigating Email Addresses

Email Address Format

localpart@domain

Some Email Service Providers:

yahoo!

Investigating Email Addresses

The importance of email addresses in OSINT investigations:

- Email addresses can be used to check if they are used in accounts on some social media platforms or websites.
- The Local-part in email addresses may be used as a username or a part of a username in some social media platforms or websites.
- The local-part in email addresses may reveal some information in some cases, such as the name, birthyear, country or possible interests of the owner of that email address.
- Email addresses may be found in the content of some webpages.

Investigating Email Addresses

(<https://github.com/megadose/holehe>): This tool checks if an email address is used on several social networks or websites.

HOLEHE

Investigating Email Addresses

(<https://tools.epieos.com/email.php>): This online tool contains a lot of features, such as:

Investigating ProtonMail Accounts

Proton Mail is an end-to-end encrypted email service with nearly 70 million users (approximately) .

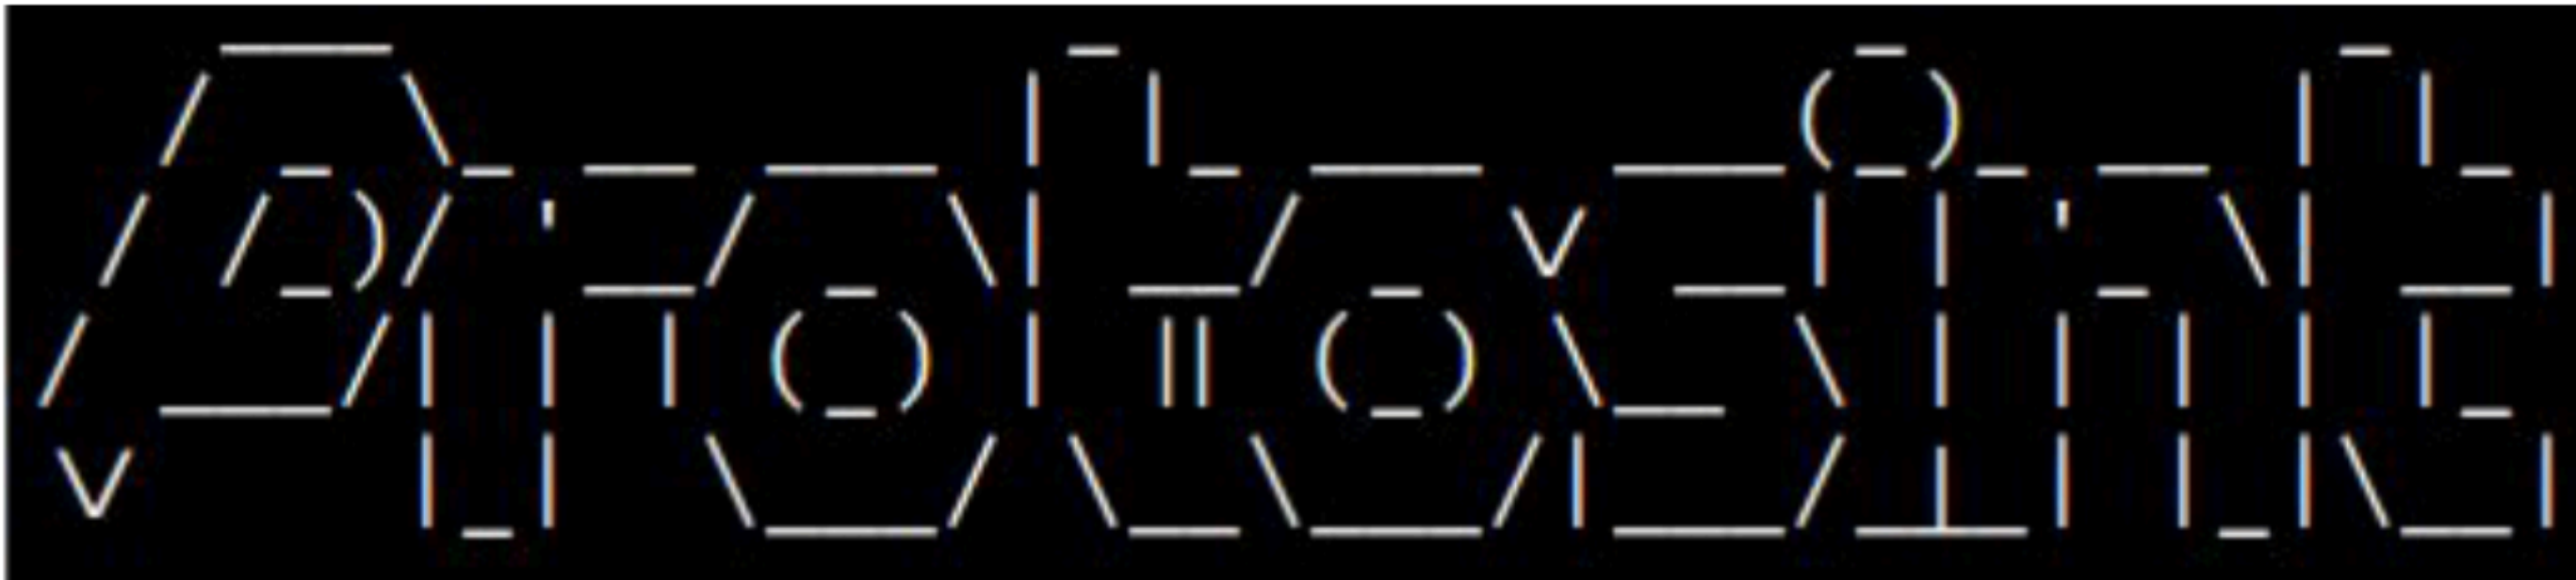

“With Proton Mail, emails are encrypted at all times, so we can never access your messages. The content of your emails is encrypted on your device before being sent to our servers, meaning only you and your intended recipient can decrypt it.” Source: <https://proton.me/mail/security>

Proton Mail

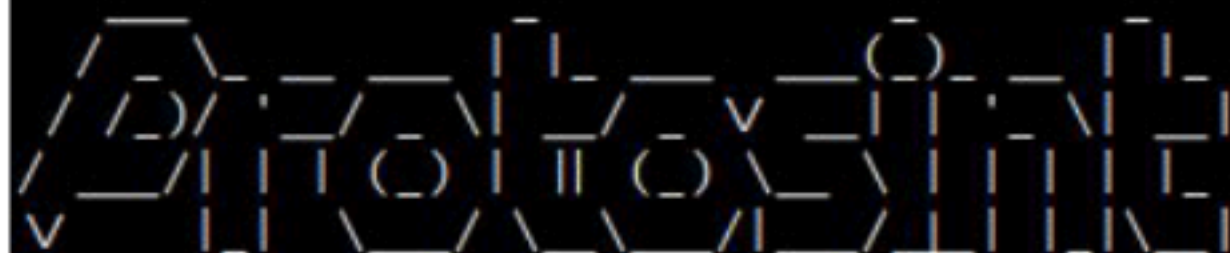

Investigating ProtonMail Accounts

ProtOSINT (<https://github.com/pixelbubble/ProtOSINT>) is a tool that is used to investigate ProtonMail accounts and ProtonVPN IP addresses.

Investigating ProtonMail Accounts

```
# python3 protosint.py
```

Protonmail API is **ONLINE**

Protonmail VPN is **ONLINE**

Let's take a look at your target:

- 1 - Test the validity of one protonmail account
- 2 - Try to find if your target have a protonmail account
- 3 - Find if your IP is currently affiliate to ProtonVPN

Choose a program: 1

You want to know if a protonmail email is real ?

Give me your email: carlos.pentapolis@protonmail.com

Protonmail email is **valid**

Date and time of the creation: 2022-06-26 04:52:36

Encryption : X25519 (Modern, fastest, secure)

Do you want to download the public key attached to the email ?

Please enter "yes" or "no": |
