

Module 2:

Introduction to SOC

Topic 1: Introduction to SOC

What is SOC

A SOC is Security Operation Center

A combination of people, processes and technology protecting the information systems of an organization through: proactive design and configuration, ongoing monitoring of system state, detection of unintended actions or undesirable state, and minimizing damage from unwanted effects

Cyber Defence

Cyber Defence provides the organization with foundational capabilities to detect, respond, and recover from cybersecurity incidents by identifying them in a timely manner, which reduces the impact to the organization. Cyber Defence efforts, while mostly technical in nature, require the ability to engage, collaborate with, and apprise leadership of incidents detected, the scope, and efforts being taken to contain and remediate.

Objectives of CyberSecurity Operations Center

- Log Collection, Log Aggregation, Security Analytics and Correlation.
- Building Threat Intelligence and Early Warning Detection System Incident Response Handling
- Monitors the Cyber Security posture and reports deficiencies
- Performs Threat and Vulnerability Analysis
- Provide Alerts and Notifications to General and Specific Threats
- Coordinates with regulatory bodies

Outsourced or Inhouse

Outsourced		In-house	
Advantage	Disadvantage	Advantage	Disadvantage
Avoid capital expenses - No extra soft/Hardware	Lack of environment knowledge	Control pricing volume	Large investment - upfront
Easy to acquire high tech people	Sending sensitive information outside the perimeter	Know the environment issues better than 3rd party	Many gaps between the analyst and the attackers

SOC Mission

Understanding the SOC Environment

People

Mindset , burnout , building career

Process

Analysis, investigation theory, triage , escalation

Technology

Protocols , SIEM , SOAR , Detection Countermeasure

SOC Roles and Duties

- Analyst
- SoC Admin
- SoC Lead
- SoC Manager
- CTI: Threat Intel

Incident Classification

		IMPACT		
		High	Mid	Low
URGENCY	High	1	2	3
	Mid	2	3	4
	Low	3	4	5

SLA

PRIORITY	Time to resolve [h]
1	2
2	8
3	24
4	36
5	160

Escalation Matrix

SOC Wiki

The screenshot shows the 'Security Operations Center' page on a MediaWiki site. The page has a light gray header with user links (Cardozax, Talk, Preferences, Watchlist, Contributions, Log out) and a navigation bar with tabs for 'Page' and 'Discussion'. A search box is located on the right. The main content area features the title 'Security Operations Center' in large red font. A left sidebar contains a list of links: 'SOC Main Page', 'About SOC', 'SOC Procedure', 'Shift Daily Checklist', 'SOC Shift Handover', 'Contacts', 'SOC Tools', 'Templates', 'Disaster Recover Site', 'Current events', and a 'Toolbox' section with links to 'STRM', 'FireEye', 'McAfee IPS', 'Security Research', and 'Miscellaneous'. The footer includes modification and access statistics, a privacy policy link, and the MediaWiki logo.

SOC Wiki Goals

Purpose of the Wiki

- Centralized Knowledge Repository for SOC
- Collaborate and Share Information with other Team Members
- Easy of use and searchable (Google Like)
- Integrations with other toolsets

SOC Wiki

Threat Case Name	Severity	Status
Unusual number of account lockout	Medium	Testing
Admin account created	Low	Production
Excessive failed login - windows	High	Testing
