

Module 4: Web Application Security

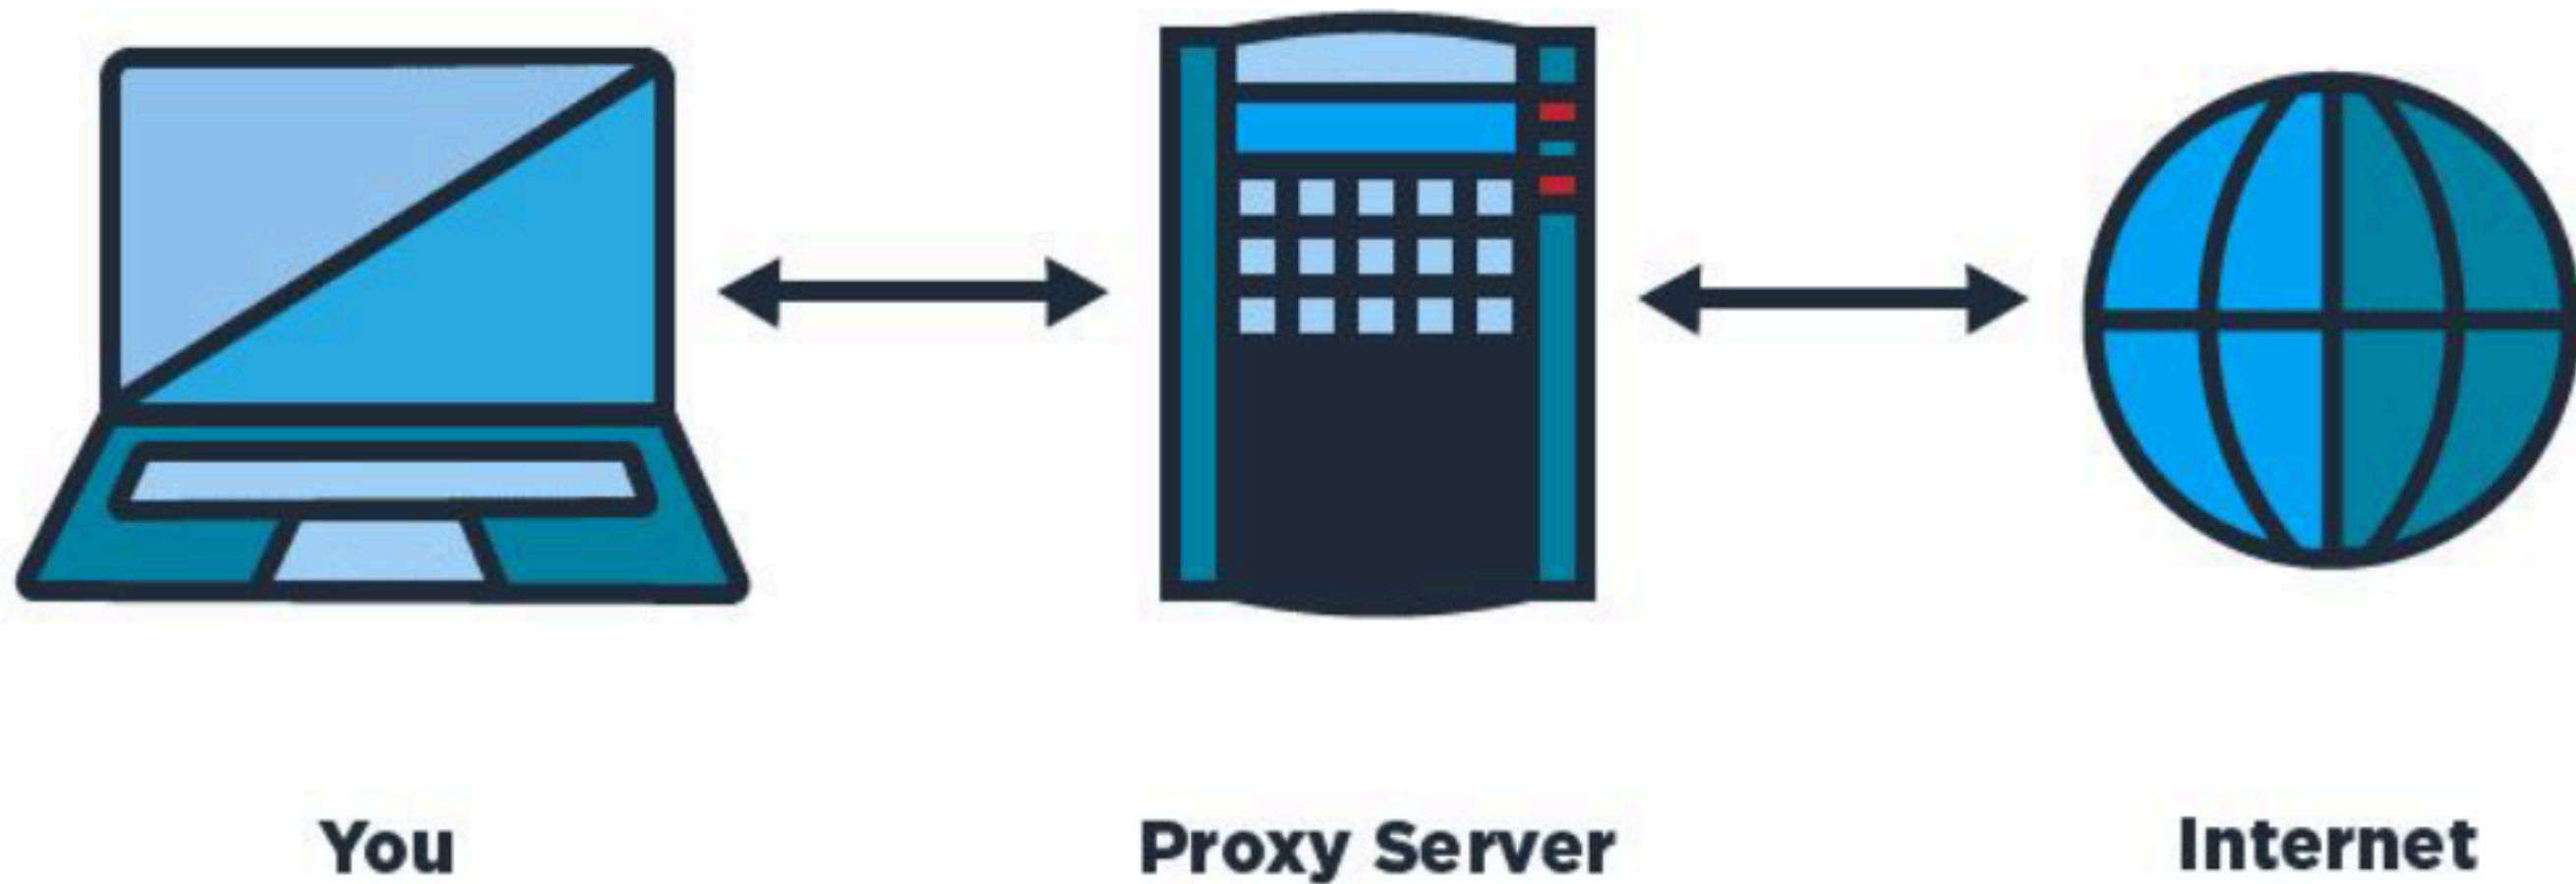

Topic 7: Burp Suite

What is Burp Suite?

A **proxy** server acts as a gateway between you and the internet

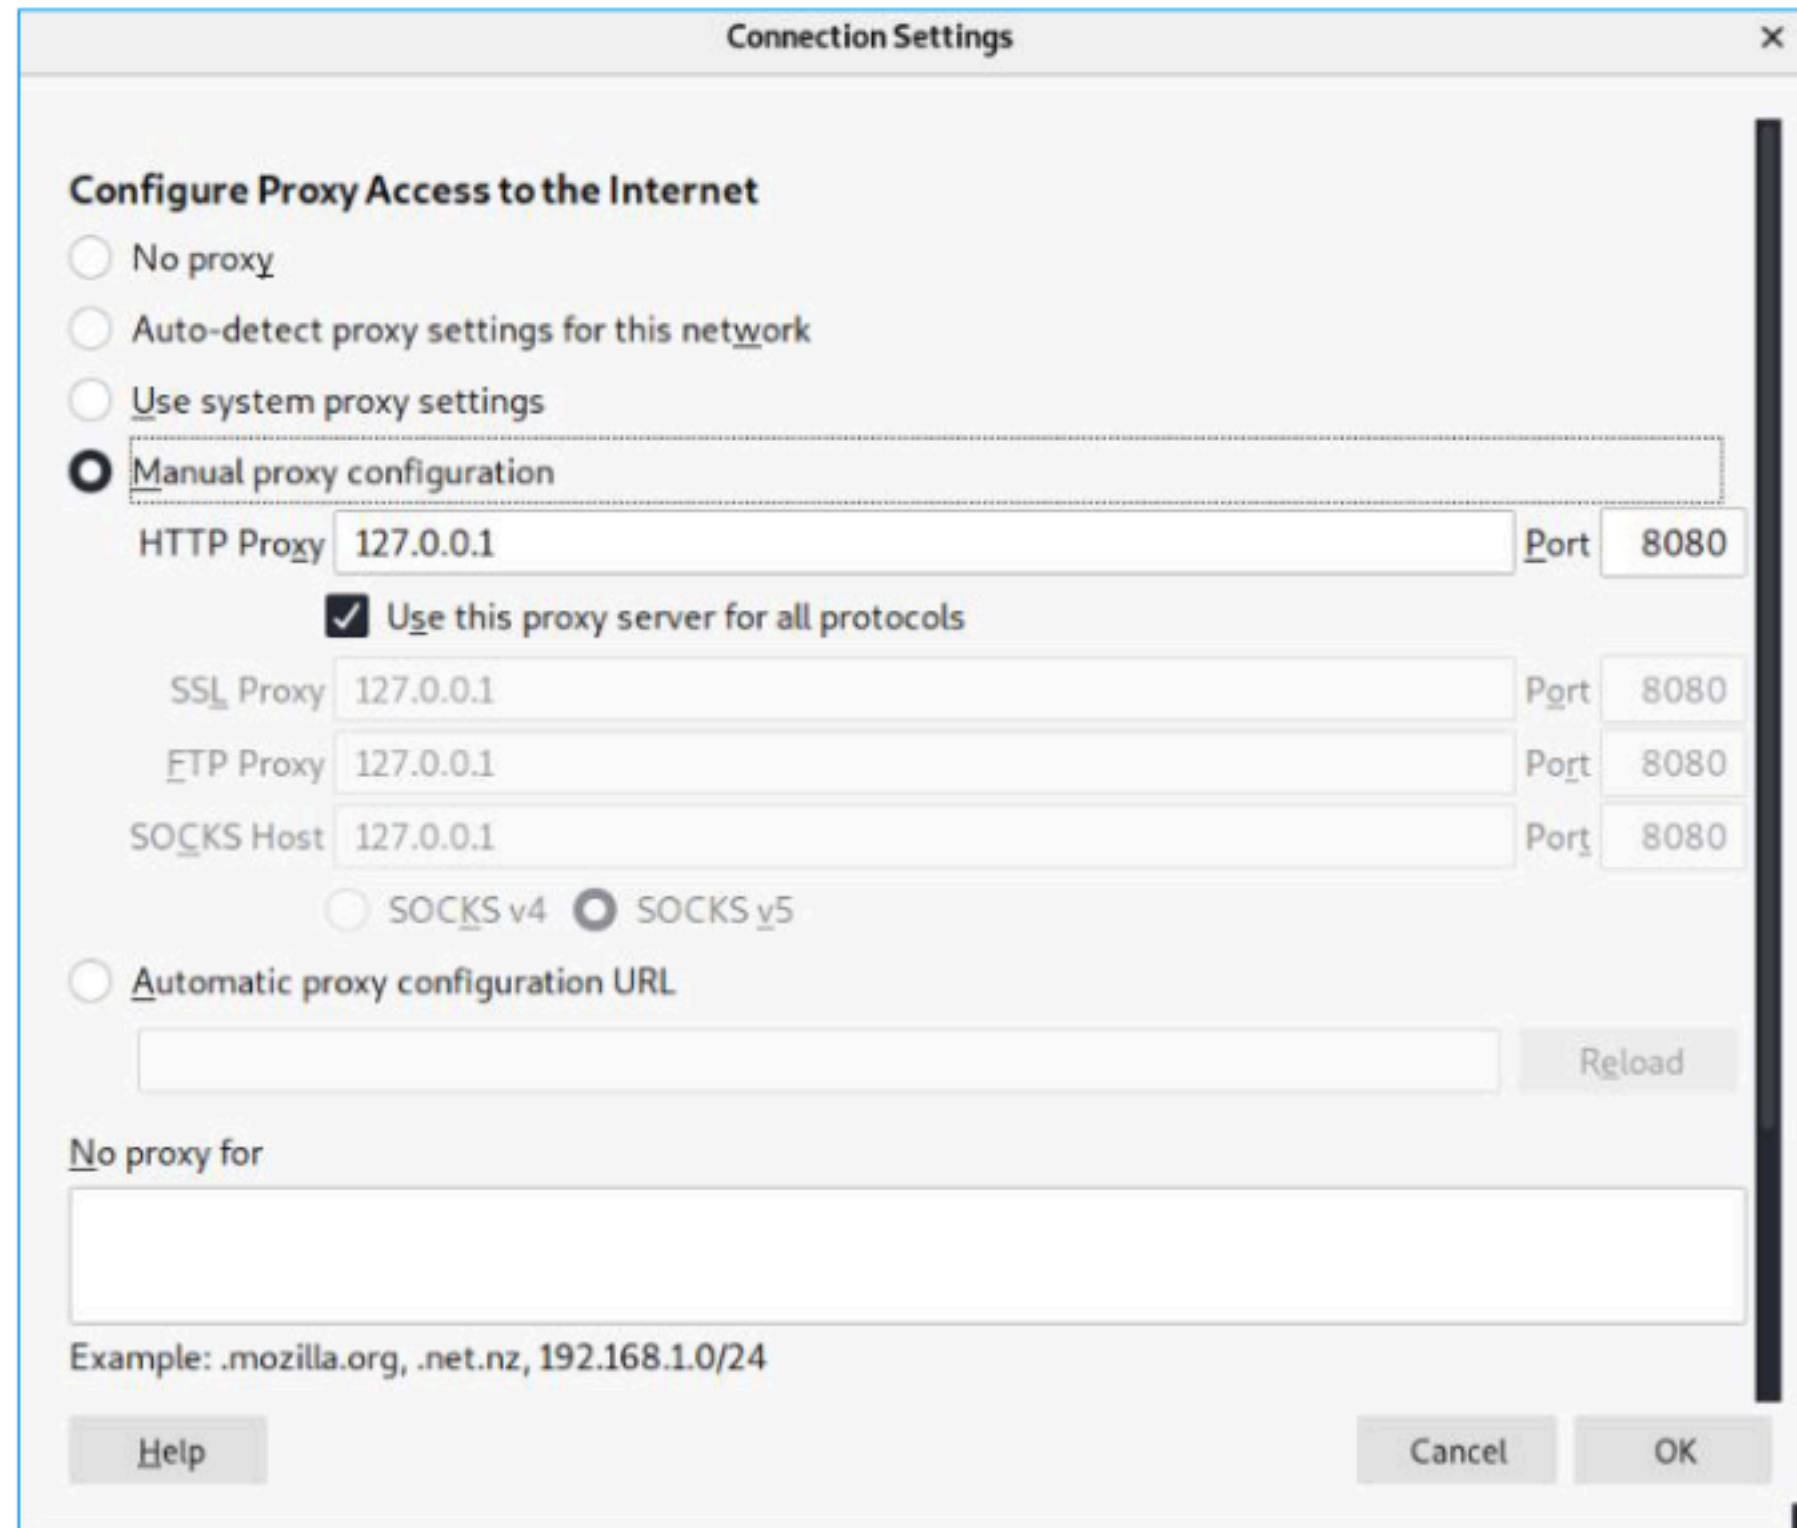

Burp Suite Configuration

- 1 - open Firefox (from preferences → Network settings → Settings).
- 2- Select the **Manual Proxy Configuration** radio button and enter **127.0.0.1** in the **HTTP Proxy** input box.
- 3- Enter **8080** in the **Port** input box.
- 4- Clear the **No Proxy For** input box, and click **OK**
- 6- import burp certificate

Burp Suite Configuration

The screenshot shows the 'Connection Settings' dialog box in Burp Suite. The 'Manual proxy configuration' option is selected. The HTTP Proxy is set to 127.0.0.1 on port 8080. The checkbox 'Use this proxy server for all protocols' is checked. The SSL Proxy, FTP Proxy, and SOCKS Host are also set to 127.0.0.1 on port 8080. The SOCKS version is set to SOCKS v5. The 'Automatic proxy configuration URL' option is not selected. The 'No proxy for' field is empty. The dialog box has a 'Help' button, 'Cancel' button, and 'OK' button.

Connection Settings

Configure Proxy Access to the Internet

☐ No proxy

☐ Auto-detect proxy settings for this network

☐ Use system proxy settings

☒ Manual proxy configuration

HTTP Proxy 127.0.0.1 Port 8080
